- Packaging dimensions (W x H x D): 494 x 371 x 275 mm
- Weight incl. Packaging: 9.1 kg

Power
- Power supply: 220-240V, 50Hz

Product highlights

Crystal-clear DAB radio
DAB (Digital Audio Broadcasting) digital radio is, in addition to FM analog transmission, a new way of broadcasting radio via a network of terrestrial transmitters. It provides listeners with more choices, and information delivered in crystal clear, crackle-free sound quality. The technology allows the receiver to lock on to the strongest signal it can be find. With DAB digital stations there are no frequencies to remember, and sets are tuned by station name, so there is no returning on the move.

USB Direct for MP3/WMA music
Simply plug in your device to the USB port on your Philips Hi-Fi system. Your digital music will be played directly from the device. Now you can share your favourite moments with family and friends.

Digital Sound Control
Digital Sound Control offers you a choice of preset Jazz, Rock, Pop and Classical controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

Dynamic Bass Boost
Dynamic Bass Boost maximises your music enjoyment by emphasising the bass content of the music throughout the range of volume settings - from low to high – at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.
